

A STUDENT

Dubai, UAE | +971 50 000 0000 | student@dubai.bits-pilani.ac.in | linkedin.com/in/example | example.vercel.app

EDUCATION

B.Eng. Computer Science Dubai, UAE

BITS Pilani, Dubai Campus Aug 2024 – May 2027 (Expected)

- Coursework: Data Structures & Algorithms, OOP, Discrete Mathematics, Computer Architecture
- Building production-grade AI and SaaS systems in parallel with full academic load from Year 1

RESEARCH INTERESTS

- Agentic AI systems and autonomous multi-agent workflow orchestration
- LLM routing architectures and intelligent backend pipeline design
- AI-augmented financial data processing and document intelligence
- Human-AI interface design for enterprise and SME applications

PROJECTS

ONCA – AI Financial Document Platform Jan 2026 – Present

- Architected AI-driven data ingestion, normalisation, and role-based restricted-access routing for CA professionals
- Privacy-first multi-tenant design; zero data leakage across client accounts
- Stack: React, Vite, Supabase (auth + DB), OpenAI API, REST APIs

Trading Edge – Retail Intelligence Terminal Feb 2026 – Present

- Co-founding Bloomberg-inspired real-time trading platform targeting retail day traders
- Designing market signal pipelines and real-time data architecture

Agentic WhatsApp CRM – SME Deployment 2024

- Built production AI-agent WhatsApp chatbot with custom CRM backend for real estate and SME lead automation
- End-to-end: lead capture, LLM intent classification, CRM write, conditional follow-up – zero manual intervention

AgentDemo – Micro-SaaS Automation Platform 2024 – 2025

- Multi-client SaaS platform; OpenAI API + n8n LLM routing, real-time Firebase/Supabase integration
- Per-client data isolation; REST API layer abstracted client-specific logic

G-Suite Parody – Hackathon (3rd Place) 2025

• Shipped complete AI productivity suite under time constraint: NLP mail de-formaliser, quirk-injection image generator

- 3rd place, debut hackathon; competed in 3 total including Deriv AI Hackathon

Weez Entertainment – Internal CRM 2025

- Delivered bespoke internal CRM for UAE entertainment client; centralised cross-team operations

TECHNICAL SKILLS

Languages Python, JavaScript (ES6+), SQL

Frameworks React, Next.js, Node.js, Vite

AI / Agents OpenAI API, LLM routing, Agentic pipelines, n8n, Prompt engineering

Databases Supabase, Firebase, PostgreSQL, Airtable, Google Sheets API

Tools Git, Postman, Figma, VS Code, REST APIs

Concepts Multi-tenant architecture, RBAC, system design, API integration, agile

ACHIEVEMENTS

- 3rd Place — inter-college hackathon, Year 1; shipped working product under competition constraints
- Deriv AI Hackathon participant — industry-organised AI competition, Dubai
- Triaxon Automation — founded AI agency; INR 10,000 revenue in 60 days, 3–4 B2B clients via cold outreach
- Weez Entertainment — delivered production CRM to UAE client while in first year of university

LANGUAGES

English (Fluent) | Urdu (Native)
